NEW TREATMENT CURES MANY BLIND CASES.

Ophthalmo-Oscillator as Invented by Dr. Garey, of Baltimore, Proves Successful Where Other Methods Have Failed, According to Statements of Patients.

World with John Condon, a blind nerves of the eye which cause the millionaire racetrack owner, of sight to either be improved or re-Chicago, in which Mr. Condon instruments. said he had been made to see THE MACHINE PERFECTED again by Dr. Henry F. Garey, a The machine was perfected three specialist, of Baltimore, prompt- years ago after more than ten years ed The Evening World to send The first experiments were conducted one of its staff to Baltimore to on inmates of blind asylums and make a fuller investigation of this almehouse. Dr. Garey became convinced that his treatment was benenew method of treating the hope- ficial, but it was some months before lessly blind.

Mr. Condon has been blind for years. His affliction is atrophy of the optic nerve, and the best experts of this country and Europe have pronounced him incurable. In his interview in The World he told how after treatment of less than a month by the Baltimore specialist his sight has been partially restored until now he can readily distinguish objects he could not see before beginning the treatment.

Mr. Condon said he was confident that his sight would ultimately be almost entirely restored, and he named Senator Money, of Mississippi, and many others whom Dr. Garey had greatly benefited after all other specialists failed.

The Evening World reporter who was sent to Baltimore spent several hours with Dr. Garey last night and the result of his investigation follows:

Dr. Henry F. Garey lives at No. 13 West Saratoga street, Baltimore. SOME CASES INCURABLE.

He admits there are some cases of blindness which he cannot cure or laration that his method of treatment only since the publicity given Sena- heard of Dr. Garey. As a last hope he has cured or greatly benefited more than 50 per cent. of the cases which he has treated and which eminent

Some of Dr. Garey's cures have seemed almost miraculous. In the case of Senator Money, of Missishas resulted in his changing his determination to resign his seat in the to get around. Now he can read and write letters and walk about.

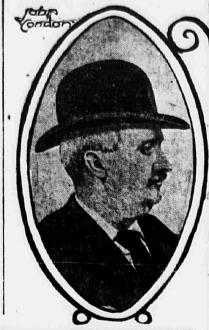

HIS EARLY STUDIES.

Dr. Garey is a regularly graduated physician of the College of Physicians and Surgeons, of Baltimore. He received his degree in 1876, and his profession in that city. Before ment prescribed by Dr. Garey for one beginning the study of medicine he had determined to devote his practice in daylight and at night. exclusively to the eye. After his graduation he devoted himself for several years to the study of diseases of the eye. At the outset his investhe greatest problem which confronted such a line of study was the enormous number of diseases which the recognized specialists of the time declared to be incurable.

Relying implicitly upon the wellrecognized principle that the nerves recognized principle that the nerves as I was before attacked by the dread-could be strengthened by exercise or ful disease of the eye," declared Mrs. stimulation, the same as the muscles Kirkpatrick. of the body, Dr. Garey began his investigations and experiments. His to an Evening World reporter, lay in of the ophthalmo oscillator, a comcaused by several valves in the ma-

CONSTRUCTION OF THE OPHTHALMO OSCILLATOR.

The machine used by Dr. Henry F. Garey, of Baltimore, in his remarkable treatment of intra-ocular diseases is very simple. It consists of an ordinary compressed-air machine driven by a two horse-

From the air cylinder of the machine there is connected a small rubber tube, designed to withstand great pressure, which spreads into a "Y" at the end. On the two points of the "Y" are fastened small glass cups which

fit snugly over the eyelids without touching the eyeball.

By a succession of valves it is possible to create an oscillation of the eyeball by means of the air pressure and vacuum produced by the

SOME OF THOSE CURED BY THE NEW PROCESS.

The following is a partial list of the cures attributed to Dr. H. F. Garey's new treatment for blindness:

Senator Hernando De Soto Money, of Mississippi.

John Condon, of Chicago, turfman and owner of the Harlem track. Chief Engineer Falkenstein, of the revenue cutter service. Mrs. Fitzpatrick Kirkpetrick, of Baltimore.

Dr. John Haig, of Leroy, Ili.

Dr. Burton W. Seymour, of Stockton, N. Y. H. I. Mills, railroad conductor of Kansas City, Mo.

J. B. Nichols, of Burkemont, Ore.

Henry Whiting, of Mount Pleasant, Ia.

Charles Krause, Confederate Veterans' Home, Baltimore, Md. William Meydenbauer, mining prospector, Sitka, Alaska.

tor Money's case by that gentleman went to him.

"Doote:," ne said. "I have a little himself that Dr. Garey has been over- daughter at home whom I have never run with patients.

The method discovered by Dr. Garey long enough to see her for one minute specialists of both Europe and America pronounced hopeless. He has the names of scores of patients who pathetically groped their way into his office assisted by an attendant, who, after a course of treatment, walked to his office unattended even at night.

Dr. Garey does not profess to he assisted by the method discovered by Dr. Garey been for one minute was a new one, which had never before been recognized by the medical profession. sippi, the cure effected by Dr. Garey timore and put himself under the treatment. On the morning he entered the office at No. 341 North Charles street, Baltimore, he had to be led about by United States Senate. His case had his wife. The first application of the gone so far that he could barely see oscillator was beneficial, and from a man who was unable to move about when Dr. Haig left Baltimore he was able to read large print and wrote a letter to Dr. Garey thanking him for he recovery of his sight.

H. I. Mills, of Kansas City, Mo., a conductor for more than fifteen years on the Missouri Pacific Railroad, was led into Dr. Garey's office less than two months ago blind, caused by atrophy of at once entered upon the practice of the optic nerve. After taking the treatmonth he left for his home alone and walked the streets of Baltimore both

WOMAN'S SIGHT RESTORED

Mrs. T. Fitzpatrick Kirkpatrick, wife of a well-known osteopathic practi-tioner, of Baltimore, was a patient. She tigations demonstrated to him that was blind being unable to even distinguish between light and darkness. After twenty applications Mrs. Kirkpatrick was restored to sight and can even sew. When seen at her home she stated tha Dr. Garey's cure of herself had been most miraculous.

"From eternal darkness it has made me so that I am practically the same

The most pathetic case treated by Dr. Garey, and all cases have pathos in them, was that of M. P. Murphy, greatest difficulty, as he said to-day editor of the Toledo Courier-Journal. For more than ten years Mr. Murphy finding the correct method for giving had been consulting the leading specialists of the United States and Europe. the nerve of the eye such exercise or Whenever he heard of a cure made by stimulation. After many experiments any physician he at once went to him and much study he evolved the idea and had him make an examination. His eyes had been operated on until his pressed-air machine by which the diagnosed by the specialists as paralysis eyeball may be given a forward and of the optic nerve, and he was told backward motion by means of the that it was useless for him to continue pressure of the air and the vacuum the search for light; that it was only a waste of time, and that he would never be cured.

seen. If you can only restore my sight

carried out the doctor's instructions Accompanying Mr. Murphy was a Mr. Comiton, of the Courier-Journal staff,

Within ten days Mr. Murphy had imsent home, and a few days later Mr. Murphy followed alone. His sight had been restored to such an extent that he could walk through a crowded street, along the correct lines for the treatment.

SEN. MONEY GRATEFUL.

In discussing his cure Senator Money

my gratitude."
Dr. Henry F. Garey, the priginator of isl the new method for treating blindness, is distinctly a Southern man. Born and raised in Baltimore, he is a son of the late Justice Henry F. Garey, of the Burreme Court, and is forty-seven years is

was hoping against hope that he had been mistaken.

ONE OF FIRST CURES.

Despairing of ever seeing again, Dr. Haig returned to his home and was told two months ago of Dr. Garey's experiments. He took the first train for Baiting again to the stratement.

The case from which Dr. Garey received the greatest publicity was that of Senting Trains and the strategy of the greatest publicity against the services of the cure started for his home to see the service of the cure started for his home to see the service of the cure started for his home to see the seat red for his home and to have his mail and correspondant to have his mail and correspond

The case from which Dr. Garey received the greatest publicity was that of Senator Money, of Mississippi. The Senator's eyes had got in such condition that it was impossible for him to transact any of his work or even walk to the Capitol alone. He was suffering from atrophy of the optic nerve, and told his friends that he would resign his seat in the Senate as he was convinced that he was going blind. He had consulted specialists both in this country and in Europe without benefit.

Through Mrs. Kirkpatrick he learned of Dr. Garey. He immediately took a train from Washington to Baltimore and asked to have the treatment administered to him. It was while taking this treatment that he became enraged at a street-car conductor in Washington and attempted to cut him with his pocket-knife.

In discussing his cure Senator Money said:

"I believe that if I failed to tendermy most sincere thanks and evidences of gratitude to Dr. Garey for the magnificent service he has rendered me I would be the most ungrateful man plive. First of all the treatment he has given me has saved me from total blindness. Had it not been for him I would probably be unable to-day to see my hand before my face. Can any one imagine a more gruesome and helpless fate, and can any one conceive of a more magnificent redemption. I think not.

"I began taking the treatment in January. At that time my eyes were in a fearful condition. My left eye had been in a bad condition for years and practically worthless, while my right eye had been growing weaker and weaker. When I went to see Dr. Garey I was near total blindness. I could not recognize my friends and was approaching the absolute helpless state.

"I went to 3ailfmore and Dr. Garey began on me the oscillation treatment. Its immediate effects were remarkable. I experienced very great benefit and my eyes were immediately greatly invigorated and my sight constantly improved as the treatment was continued.

"I know nothing of the theory of medicine, but it seems that as far as this particular specialty is concerned medicine to the relegated to oblizion. In my case it was an extraordinary care. I could not read the newspapers. I can now do so, and can see better than I have at any time during the past three years. I am deeply thankful. I am constantly improving, and hope to continue to do so. I know I owe my signt to Dr. I Garey, the originator of the new method for treating blindness.

APPLYING THE NEW TREATMENT TO A PATIENT'S

of treatment and does not hesiate the say that there are many cases of blindness which it will not benefit. He says that it will benefit some incurable cares in that it removes the sensation of pain and annoyance caused by the atrophied between

nerves.
"Blindness will soon be a disease yield-

"Patients have been led into my office by an attendant and have told me that the greatest specialists of Europe and the United States have told them that their cases were hopeless. After taking my treatment for a short while they have visited me in my office and have gone to their hotels and boarding-houses alone and unaided. They could not see when they first came here. Now they can see. They say so themselves, and I have seen them walking about crowded streets without assistance. This has not accidentally happened in a remote case, but in scores of instances. I do not claim to perform miracles.

"What I do claim is that if there is any sight left in an eye, no matter how slight, my method and treatment will so develop and strengthen it until it can be made useful. By useful signt I do not mean that a man can go about doing the things which require the keenest sight, but a patient can move about without assistance. In other words, that the patignt will not be help-less.

"Even the ability to distinguish objects CASES LOOKED HOPELESS.

ss. Even the ability to distinguish object

"Even the ability to distinguish object and move around without assistance the greatest boon that can be given owho cannot even see to walk about there is any sight remaining method will take a man from absolt darkness and helplessness to light a partial independence. That's all claim for it.

MACHINE NOT THE CURE.

"The machine I have perfected is the cure. In the hands of the lay it is worthless. It is only with greatest care and observation that proper osicilations are ascertained the individual cases. I have hundred letters each week acking me to see machine. That is impossible. It we do the patient

"There is nothing wonderful about I machine, it is simply the instrume for doing the work of exercising, mi saging, vibrating—call it what you will of the eyeball, which is communicate the nerves of nurtition and sight the posterior portion of the eye.

"From the experience I have gain in the past six months in treating case which other specialists have proposed. incurable I will say that I can cure in per cent. of them. That is my averag so far. Of course, this may be diminished or increased, time and practice only will demonstrate."

BUILD OF MACHINE.

cold. He has been since his graduation a firm believer in homocopathy.

LIFE'S WORR COMPLETED.

From early morning until late at night there is a procession of the blind being led to Dr. Garey's office. They are of all conditions, rich and poor, black and white, and all are given an examination. Those too poor to pay for it are subjected to as careful a scrutiny as others who come in carriages. If there is any hope for them they are given the same treatment as those who pay for it.

MAY NOT BENEFIT SOME.

Dr. Garey talks freely of his method of treatment and does not hesitate to say that there are many cases of blind-the say that there are many cases of blind-the says that there are many cases of blind-the says cut so fashioned.

treatment exercises the openal and the optic nerves by bringing forward and pushing backward the eye proper, the optic nerves by bringing forward and pushing backward the eye proper, the optic new backward the eye proper, the optic op

that investigators are now working along the correct lines for the treatment of blindness caused by disease. I am convinced that in future those who are born so or have been made so by accident. Of course in the case of the treatment I use would be of no value whatever.

"The blind and partially blind can be restored to useful sight. By that I mean that they can be made to see sufficiently to prevent their being utterly helpless. "I have made the blind see. That is all I claim. It is my only recommendation. I do not care whether patients come to me for treatment or not. I am satisfied with my work as far as it has gone.

CASES LOOKED HOPELESS.

TREATMENT NOT PAINFUL.

The treatment although at time great pressure is used is absolutely painless, and the patients declare that the air pushing and pulling at their eyes gives a very refreshing sensation. By applying the cups to any part of the body where there is an ache or pain it has been immediately removed. Dr. Garey frequently uses the machine to cube headaches in his family. He declared that the most obstinate headache could be cured within five minutes by the continued use of the oscillator.

After explaining the operation of the optimise by the continued use of the oscillator.

After explaining the operation of the optimise of popular explaining the operation of the every year simply because when their eyesight begins to fail they pay no attention to it. It is much easier to cure a disease in its inception than it is after it has become far advanced. My eyes are failing is to at once consuit a specialist. Find out what is the matter, and see if the disease (for disease it certainly is) will not yield to treatment. The eye is something the care of which should never be delayed for a day. Go

FOOD TREATMENT. Old Stomachs Made Over.

Improper medicine knocks out as many stomachs as bad food, but proper food will nearly always restore the health that Nature in-

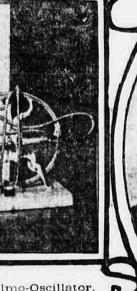

"I suffered with chronic constipation for a long time, and two years ago became an invalid, being unable to retain anything on my stomach," says Mrs. F. M. Buss, of Millersburg,

"Physicians pronounced it catarrh of the stomach and bowels. In fact, the entire alimentary canal was in-volved caused, they said, by continued use of purgatives. For several weeks I could not retain more than a teaspoonful of any kind of fluid at any time, and at this stage of my Hiness a friend suggested that I try Grape-Nuts.
"I commenced by taking only a

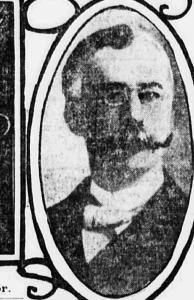

teaspoonful at a time of the water poured, while boiling, over two teaspoonfuls of the Grape-Nuts. In five days I was able to digest a teaspoon-ful of the Grape-Nuts themselves, and in less than a month could digest an ordinary meal. I can eat anything now after having used Grape-Nuts for nearly two years, and am en-tirely cured of constipation. It is a wholesome, pure and inexpensive

Really Consists of a System of Eye Massage Which Brings Out Force of Nerves That Have Been Affected-Some of the Cures.

Many of his patients who rushed away to their homes after securing the first beneficial results of the treatment are planning to return to Baltimore to spend several months in order that Dr. Garey may carefully watch their improvement. Mr. Condon has written Dr. Garey a letter, in which he states that he intends spending all of the coming winter in Baltimore.

The oscillator has been adopted by a number of oculists who are now using it in their practice with gratifying results. Dr. Garey is disinclined to permit others to experiment with the machine, as he says that they have not always given it a fair trial.
